

Daniel Rothig
For: Publicity

Nominated by: EC
Seconded by: EC

I am running for the office of Publicity because I believe that SciSoc has a unique potency to advocate the diversity of science and to provide a platform of scientific exchange for the student body of Cambridge. My aim is to sustain our central position as Cambridge's largest science society by increasing our efforts to collaborate with other societies and to co-ordinate our cooperation with Cambridge's student journals (BlueSci, TheTriple Helix). Moreover, I will endeavour to increase our presence among humanities students by promoting our most accessible events beyond our usual channels, so as to reestablish SciSoc's reputation as a society for every student. As a committed member of the GC, and last year's IA Student Representative in the Consultative Committee of the Chemistry Department, I am equipped to be a productive and dedicated member of the Executive Committee. By promoting SciSoc in both well-proven and innovative ways, we can put our name once more to the top of the lists.
