

I am Valentijn Karemaker and I am running for the position of junior treasurer of the Scientific Society.

It's not hard to spot a connection between the facts that I'm a (first-year) mathematician and that I'm standing for treasurer. But although I can ensure you that I can count, this is not my reason for standing;

Since the last term I have been a member of the General Committee and as such I have helped out at the events and attended the meetings. I have realised how rewarding it is to give students the opportunity to hear about these exciting bits of scientific research and therefore I would like to get more involved in the organisation of these events.

I am enthusiastic and committed, punctual and reliable. As treasurer I would take great care for SciSoc's financial situation and also I would be willing to help the Executive Committee in other ways.

Finally, my past experience in the symposium committee at Utrecht University has taught me how to deal with (financial) situations that arise while organising events. It would be a perfect opportunity for me to apply this knowledge and extend my experience further.
